Activities Along the Waterfront—Boat Builders Hustling—True Blue Society Votes \$5 to Village Improvement Society.

The force of men at the Palmer shipyard has been increased by about 40 who arrived the latter part of the week, most of them for the Doverfield being made into a six-masted schooner. The boat is being raised several feet on each end and about three feet in the middle.
The lighter Palmer is being repaired and painted and new rudder put on.
The stern for schooner Number Two has been put in place and the iron straps on schooner Number One are being riveted. Foreman James Whitely has charge of the work.
Hamilton & Chambers have put in the concrete foundation for the guys for the derrick and concrete walls have been built on each side of the ways, making the pocket about six feet wider.

HOW TO BE SLIM
If you are too fat and want to reduce your weight 15 or 20 pounds, don't starve and weaken your system, or think you must always be laughed at on account of your fat, but go to any good druggist, get a box of Oil of Kora capsules, take one after each meal and one before retiring at night.
Weigh yourself once a week and note what a pleasant and reliable method this is for removing superfluous fat from any part of the body.
It costs little, is absolutely harmless and a week's trial should convince anyone that it is unnecessary to be burdened with even a single pound of unsightly fat. Lee & Osmond can supply you.

TELEPHONE DEAD-HEADING
Favored by Many Subscribers, Although Company Aims to Stop It

Spirited kicking against the Southern New England Telephone company's suggestion that subscribers to their service decline to allow persons to use the telephones was heard at various places in the business section Monday morning. Some of the more strenuous of the objectors say they will pull the instruments up by the roots, as it were, and chuck them out, doing without service, before they will submit to any such arrangement.

One busy man pointed out that he keeps his telephone chiefly for use of his customers more especially than for his personal use and that he will not stand for not allowing them to talk to points in the Danielson division. The new proposition was discussed with more or less liveliness along the line. There are, of course, some subscribers who have been pestered by persons requesting the use of their lines and they are for the innovation, but there is a formidable aggregation of other subscribers who resent deeply any plan intended to curtail what they consider their rights in the service, their right, however, being debatable ground, it is claimed.

An agent of the telephone company has been in town interviewing subscribers relative to the restriction of the service from persons who run with the request "May I use your telephone?"

Suppose Fatimas were NOT Sensible

It isn't possible to fool men for long. Lincoln said that better than we could. Surely, if Fatimas were not as comfortable to the throat and tongue as we say they are—if they did not leave a man feeling keen and "fit" after a long-smoking day—do you suppose that more Fatimas would be sold every day than any other high-grade cigarette? Remember these facts as you try Fatimas and observe how comfortable, how sensible they really are.

INVESTIGATION OF HIGH PRICE OF COAL AND FOODSTUFFS
Developed That the Way Coal Prices Were Raised Was Suspectious.

New York, Nov. 20.—Investigation by the district attorney's office of the higher cost of coal and foodstuffs was well under way today. Twenty coal dealers, large and small, have been summoned to explain what was characterized by District Attorney Swann as a "terrible" situation.

"The way coal prices have been raised here is suspicious, to say the least," said Mr. Swann.

One member of a firm which sells three million tons annually in this city attributed the coal shortage in October to conditions at the mines, resulting from a scarcity of labor. He explained that this was due in part to the refusal of union men in good standing to work with other miners who were behind in their union dues.

The dealer asserted that in October he had to go into the open market to buy coal, paying as high as \$12 a ton. Conditions now have returned to normal, he said, and the wholesale price at the mines is only a few cents a ton higher than last year.

Mr. Swann also is inquiring into the increased price charged for poultry and bread. He is prepared to protect the small dealers in poultry who are inclined to charge reasonable prices, he said, by preventing under the state anti-trust law associations of wholesalers who try to force prices higher.

Investigation of the bread situation has been complicated, it was stated, by the fact that different prices are charged in different parts of the city.

ACCIDENTS TO RAILROAD SWITCHMEN AND YARDMEN
2,243 Were Killed or Injured During July, August and September, 1915.

New York, Nov. 20.—Government statistics dealing with accidents to switchmen and yardmen employed by the railroads of the country were presented as evidence late today at the hearing before the board of arbitration in the controversy between the Switchmen's union and thirteen railroads. It was shown that 2,243 switchmen and yardmen had been killed and injured in the months of July, August and September, 1915. A table based on those figures gave 9,732 killed and injured for a year, or about one man in five among the 45,000 switchmen and yardmen in the United States. The number of killed was placed at 385.

Representatives of the railroads objected to the admission of the figures, contending that general conditions have no part in the controversy. The board permitted them to go on the record, however, with the understanding that the members of the board would take them under advisement.

After the case for the switchmen had been closed, W. H. O'Keefe, assistant general superintendent of the Michigan Central railroad, the first witness for the railroads, asserted that as eight hour law is unworkable in the hearing will be continued tomorrow.

\$120,000 BET THAT WAR WOULD END IN OCT., 1916
By Stock Exchange and Commercial Men of Amsterdam.

Amsterdam, Nov. 5.—(Correspondence of The Associated Press.)—Whether the war would end before October, 1916, was the subject of a \$120,000 bet just liquidated at Amsterdam. The members of the respective groups concerned were principally stock exchange and commercial men and the bet was entered into last year. Both parties had insured their chances of losing on policies for which 10 per cent premium was paid and the risk of such policies was again distributed over various companies. The winners of the bet had \$125,000 to distribute, whilst the losers had to pay \$12,000. The main damage fell upon the insurance combination.
